

YOUR NAME

Hyderabad, India | your.email@example.com | +91-XXXXXXXXXX | linkedin.com/in/yourname | github.com/yourusername

PROFESSIONAL SUMMARY

Data Analyst with hands-on experience in Excel, SQL, Python, and Tableau, skilled at translating raw transactional data into clear business recommendations. Built an end-to-end e-commerce analytics project covering data validation, revenue and seasonality analysis, and executive dashboarding. Comfortable working across the full analytics stack and communicating findings to non-technical stakeholders.

TECHNICAL SKILLS

- Languages & Query Tools: SQL (SQLite/MySQL), Python (Pandas, NumPy, Matplotlib)
- BI & Visualization: Tableau, Microsoft Excel (PivotTables, SUMIFS/COUNTIFS, charting)
- Other Tools: Jupyter Notebook, Git/GitHub, Google Sheets
- Core Skills: Data cleaning & validation, exploratory data analysis, dashboard design, business requirement gathering, stakeholder communication

PROJECTS

AromaKart Perfume Sales Analytics Dashboard — Personal Project

2026

End-to-end Data Analyst project across Excel, SQL, Python, and Tableau | [github.com/yourusername/perfume-sales-analytics-dashboard](#)

- Analyzed 3,000 e-commerce order records across 18 cities and 12 brands to identify revenue drivers, seasonal demand patterns, and return-rate risk for a retail business.
- Built an Excel dashboard using SUMIFS/COUNTIFS formulas and PivotTables, eliminating hardcoded figures and enabling live recalculation as data changes.
- Wrote 15+ SQL queries (aggregations, CTEs) in SQLite to quantify seasonal revenue spikes, repeat-customer revenue share, and category performance by city.
- Performed exploratory data analysis in Python (Pandas, Matplotlib), uncovering a 35-50% higher return rate on premium products compared to budget products.
- Designed a 5-panel Tableau dashboard consolidating city, brand, time-series, delivery-status, and payment-method views for executive reporting.
- Delivered 5 data-backed business recommendations, including inventory timing ahead of peak season and a proposed loyalty program for top repeat customers.

EDUCATION

Your Degree (e.g., B.Tech / B.Sc / B.Com) — Your University

20XX – 20XX

- Relevant coursework: Statistics, Databases, Data Structures, Business Analytics (edit as applicable)

CERTIFICATIONS (OPTIONAL — EDIT AS APPLICABLE)

- Google Data Analytics Professional Certificate (or equivalent)
- SQL / Excel / Tableau certification of your choice
