

Business Questions

Questions this analysis is designed to answer

Strategic Questions (15)

- What is the month-over-month revenue trend from Jan 2025 to Jun 2026?
- Which cities generate the highest total revenue and order volume?
- Which brands and individual perfumes are top revenue vs. top volume generators?
- How much does revenue spike around Diwali, Valentine's Day, New Year, and wedding season?
- What percentage of total revenue comes from repeat customers vs. one-time buyers?
- Who are AromaKart's top 20 customers by lifetime spend?
- What is the average discount per brand tier, and how does it correlate with volume?
- Is UPI the dominant payment method across all cities, or does it vary by region?
- What is the overall return and cancellation rate, and how does it differ by brand tier?
- Which product category (Men, Women, Unisex) sells better in which cities?
- What is the average order value (AOV) by city vs. the national average?
- How much revenue is 'lost' to discounts each month, and is it offset by volume?
- Which payment method has the highest cancellation/return rate?
- Is there a relationship between order quantity and discount percentage?
- Which brand delivers the best revenue-per-order-line efficiency?

How These Will Be Answered

Each question will be tackled with a different tool across the 7-day project: Excel PivotTables (Day 2), SQL aggregate queries (Day 3), Python pandas/EDA (Day 4), and an interactive Tableau dashboard (Day 5) — giving you hands-on, interview-ready experience with the full analytics toolchain.
